

Fund Climate Report

Publication Date: 30 June 2025

*Acquired by the Group in April 2023, Sun Life Assurance Company of Canada (U.K.) Limited ('SLOC UK') was renamed Phoenix Life CA Limited on 18 November 2024

This report provides information on what climate change could mean for your investments.

Please read our report alongside the [Climate Information Guide](#). It's designed to help you learn more about the terms used in this report.

The calculations within this document are based on the available assets held in a fund as at 31 December 2024, using the latest available climate emissions data.

This document does not constitute financial advice and you should consult an expert prior to making any investment decisions based on this information.

Climate change is the long-term shift in temperatures and weather patterns and how you're invested could have either a positive or negative effect on tackling the climate crisis.

Please see the [Climate Information Guide](#) for further information.

The report shows climate information for our With-Profits and Unit Linked Funds

If you're invested in a with-profits fund

With-profits funds have a variety of different types of investments, known as assets. The combination and amounts of these assets depend on the policy you have.

The climate figures for each with-profits fund uses the average mix of assets held at 31 December 2024.

You can find out more about your with-profits investment with us at www.phoenixlife.co.uk/customer-centre/manage-my-policy/with-profits

If you're invested in a unit linked fund

A unit-linked fund, otherwise known as an insured fund, is a fund that is linked to a plan issued by an insurance company that lets you combine your money with other planholders. If you are invested in a lifestyle profile, the unit linked funds you're invested in will depend on how close you are to retirement. You can see these by looking at your annual statement.

To see the funds you are invested in, please look at your annual benefit statement.

Governance, Strategy and Risk Management Framework

Click [here](#) to find out more.

Carbon Footprint Metrics

Carbon Footprint is the total greenhouse gas (GHG) emissions caused by an individual, event, organisation, service, place or product, expressed as carbon dioxide equivalent (CO₂e).

Click [here](#) to find out more.

Climate Value at Risk Metrics

Climate Value at Risk estimates the potential level of financial change which could happen in a fund because of climate related impacts.

Click [here](#) to find out more.

Alignment Metrics

Alignment metrics estimate the proportion of a fund that has science-based emission targets and the climate warming scenario a fund is aligned to.

Click [here](#) to find out more.
